**ADD47**  
**QUARTZ SHAMPOO®**

**A MUST HAVE! Revolutionary Quartz Shampoo**

Revolutionary washing product - car shampoo which creates a protective quartz coating on the paintwork during washing. The quartz coating significantly improves the appearance of the paintwork, protecting it against the influence of weather conditions and preventing dirt deposition. High hydrophobicity, which is activated during washing, is a distinctive feature of this quartz shampoo. The liquid quartz contained in the Quartz Shampoo will suppress the foam without diminishing the cleaning properties of the product. Each subsequent wash with this shampoo extends the life of the applied quartz coating.

-  PROVIDES SUPER GLOSS EFFECT
-  QUARTZ PROTECTION
-  SUPER HYDROPHOBIC EFFECT

SCAN QR CODE AND GET DETAILS

**CAR BODY WASH**

Our range of products for hand washing of cars consists of effective and efficient shampoos: **AUTO SHAMPOO** with a neutral pH which ensures perfect and safe washing, **SHAMPOO WAX** that cleans and secures the car body with a layer wax at the same time and **QUARTZ SHAMPOO®**, which coats the washed surfaces with a super hydrophobic and very durable quartz coating.

**ADD29**  
**QUICK SHINE**

**Maintenance of car body after washing**

Product used to add a finishing touch to the process of car body maintenance. Perfect for use after washing the car with hard running water which leaves mineral traces on the car body after drying. Removes mineral sediments. The product fills in micro scratches and gives shine and UV protection to the car body paint. The product is completely safe for waxes and other coatings which are protecting the paintwork.

-  REMOVES WATER SPOTS
-  UV PROTECTION
-  PROVIDES SUPER GLOSS

**CAR BODY WASH**

We offer cleaning aids and finishing products for manual car washing. **QUICK SHINE** will remove marks left after washing or rinsing the car with hard water. The product is also great for dry cleaning. **IPA CLEANER** will guarantee effective degreasing before the application of any protective coating.

**ADD05**  
**QUARTZ RELOADER** ◀ **NEW!**

**Renewal of ceramic coatings**

Innovative quartz-ceramic lotion that creates a highly hydrophobic and incredibly slippery layer on surfaces that have been previously protected. It also improves shine and color depth.

It is best to use the product every six months to revitalize the ceramic coatings on the paintwork or rims, however, it can also be used as a protective coating on its own.

Perfectly fills in micropores, giving the surface extra shine and smoothness. The slipperiness of the surface after it has been treated, makes dirt adhesion much more difficult and slows down the wear of the ceramic coating or the car body paint itself, if the product was applied as a stand alone protection.

- SUPER HYDROPHOBIC EFFECT
- LONG-TERM PAINT PROTECTION
- NANOTECHNOLOGY

CHERRY: ADB07

**BLEEDING RIM®** **HIT!**

**Rim cleaning and maintenance**

An innovative and professional product for cleaning rims from stubborn metallic dirt, rust and dust from brake pads. Product's name comes from the red color that the agent obtains when it reacts with dirt. This effect easily shows how necessary it was to clean the rim. The has a consistency of a gel and is thick enough to slow down its run off from the surface, thus letting it effectively penetrate the entire surface of the rim. The product can be used for cleaning aluminum rims as well as the ones that are chromed or painted. The Bleeding Rim has a neutral pH 7, therefore it can also be used on the bodywork.

- ALUMINIUM, CHROME AND PAINT-COATED WHEEL RIMS
- ACTION TIME: 2 MINUTES
